

## NURSE VIETTY, SHYOGWE CLINIC, RWANDA

In a recent report Vietty told us that in a three month period his work in immunization, maternity and consultation services saw him treat 3371 people.

He also told us of his joy as the effects of malaria in the area have been reduced.

We can only imagine the strain on the other staff at Shyogwe Clinic if they did not have his services.

On a personal level he said:

"At family level I am very happy that God has given us a child. I have been helping other parents caring for their babies and now I will have my own personal experience in raising up children. I am excited!"

Finally Vietty told us:

"Generally speaking, I feel happy with my work as I help people to have a good life. I do thank the staff and supporters of Christian Hope International for their financial and moral support.

May God bless. Viety."

A young child is treated for malaria

Your prayers are requested for; the health and safety of his child as he grows and for the opportunity for further training to increase his knowledge and skills.

## NURSE BRIGITTE, GIKOMERO CLINIC, RWANDA

Brigitte's role includes counselling, testing, consultations, family planning and care of the under five's. She is kept very busy but she tells us:

*"I am happy that God uses me to save and to protect lives of his people. To me this is a great privilege. I try to share the Gospel with those who come to our health centre and a good number of them are really listening and I hope God will touch their hearts and save them from their sins. Of course this nursing work is very demanding, but it is also rewarding when we see a person recovering from deadly disease like malaria.*

*I am thankful for Christian Hope International for the offer of my salary. And I pray that even after the Brexit, it will be able to continue this noble work. May God bless you."*

## NURSE PROSSY AND MOSES, KIMWANYI CLINIC, UGANDA

Prossy tells us that thanks to your support the clinic staff are being paid on time and medicines are available. She tells us both her children are now at school and she thanks God that she is able to pay the school fees.

Your prayers are requested for oxygen to be available for the new born babies as this is a challenge at night when they cannot be transferred.

When funding from a larger charity was withdrawn CHI agreed to part fund Moses salary for 1 year as we were so impressed with the difference he had made to Kimwanyi Clinic when we visited in 2016.

Moses says: "I promise to continue my commitment of serving the centre and the community it serves, thank you very much"

He asks for your prayers for the repair of his house which was damaged in a recent earthquake
