

# NURSE + May 2015

## Nurse Prossy, Kimwanyi Clinic, Uganda

In a recent letter Prossy told us a little about her family:

Dear sponsors, I greet you in the name of our Lord Jesus Christ and thank you for everything that you are doing....."We are a family of 6 people, my husband, myself, 2 biological sons and 2 children of my sister who passed away. We live in a two roomed house which we rent".....

Baby Moses safe & warm

### Reporting on the work at the clinic Prossy told us of the following incident:

"It was 13th April 2015, we got advised of an abandoned kid behind the building outside the fence, without any clothes on its body and the cord was not tied. Immediately we rushed and bought some clothing to cover the baby. It's cord was tied. Afterwards we got some warm water and bathed the baby, it was provided with other clothing and taken to the maternity ward and put in the incubator for warmth..

The challenges we were faced with were:

- We had not enough clothing
- No cushion in the incubator
- No feeding bottles

The fortunate part of it was that this baby was not in need of oxygen."

**Pastor Patrick Ssimbwa who oversees our work at Kimwanyi Clinic told us in an email:**

*"It's by the Grace of God and the professional help of Prossy that this baby was saved and we have named him MOSES."*

## Nurse Viety, Shyogwe Clinic, Rwanda

He Writes: "I am Viety Rubayiza, I work here as a nurse and my main task is immunization, but sometimes I help in other service such as curative treatment. My working day starts at 7:30. We begin with a pray and biblical meditation together with other staff members. .... I really enjoy my work, helping people to protect the life of the mothers and their babies and I am thankful that

God has given me such opportunity to serve his people ..... The story from the mothers and the fellowship with my fellow nurses help me to grow spiritually ..... In the last four months of this year I served 2400 people (average of 800 per month). .....The most occurring diseases we have had were malaria, flu, and cough. .... Thank you much and extend our appreciation to all CHI supporters. Your love is felt and your support is making difference in Rwanda. God bless you."

## Nurse Brigitte, Gikomero Clinic, Rwanda

Our project partner tells us:

"On this occasion, Brigitte was unable to give her detailed news. She is not feeling well... She is pregnant now. She has been waiting for this to happen for many year but she has failed and now God has blessed her with the pregnancy. She asks you to pray for her and to join her in thanksgiving...."

**THANK YOU FOR CONTINUING TO PARTNER US IN THIS WORK**
