

Funds received through our School Partners Project have certainly gone a long way at St Peters College during 2016.

**A cow to provide manure so increasing the crop yield and improving the nutrition of all pupils is proving a valuable addition to the school.**

Repainting the classrooms has maintained a pleasant working environment and helped to motivate staff and pupils alike.

**THANK YOU**

*Software, keyboards and mice for the computers purchased last year were provided for the school's IT department.*

**Two worship events were also facilitated. A visit to St Peter's College by students from St Joseph's was followed by a visit of the St Peter's students to Ecosse School. Refreshments and transport for the students were provided from the funds sent.**
