

KIBUNGO SCHOOL PARTNERS 2019

Gahima Agape School in Kibungo is working hard to keep up with modern technology. As a church funded school they cannot rely on the Government to provide the latest technology, things the students need to give them a good head start in tomorrow's society. Thanks to your contributions to our School Partners Funds this year a new modem has been purchased to help improve internet speed and a laptop computer is due to arrive at the school very soon. This will enable text books, which are very expensive to buy in Rwanda, to be downloaded and printed by the school to enable all students to access the information required.

Projector received

THANK YOU

Internet modem

Earlier in the year your donations purchased an Acer projector to help learners improve their skills. Videos are used as well as the written word to help enhance learning. Unfortunately, although technology it is incredibly important to the students of today, it is far from photogenic, so please excuse the lack of human interest and lovely smiles as we let you see how your money is helping these young people.
